---

I like the idea for sure. Kristine, what do you mean by "proposed plan"- the ROD?

Thanks

Rick - I think it is a great idea. It's better to get this pinned down before the proposed plan to show that there is actually a "plan" other than just stating that the expectation is that the City and DEQ will control sources. The first session should probably be a "where are we at" session. Look forward to the discussions.

Subject: EPA/DEQ/City meetings

I would like for us to begin scheduling the session(s) we discussed at the last joint agency meeting where we talked about the importance of working up a joint understanding of the status of source control. It seems worthwhile to identify and agree upon the steps we must take (and we hope a unified message that we can be prepared to deliver as the draft FS is rolled out) to be sure we will have sources sufficiently under control by the time of the ROD and remedy implementation. I proposed at the time that we have a series of efficient meetings to flesh all this out with a target of an agreed upon approach before the end of the year. I think it is important to figure out if EPA, DEQ and the City are headed toward the same destination on this important issue. Let me know if this is okay and I can have Sara check availabilities.
